

Q1 NEWSLETTER 2017

CAPABILITIES

CMC

Planned modifications to the GMP manufacturing suite entrance area to further enhance current environmental controls have been completed

API

The 5 litre streams are now in place and the 20L streams are planned for Q2 2017.

DMPK

ARCINOVA have invested in latest Waters Xevo TQ XS LC-MS system. This state-of-the-art system ensures that ARCINOVA can provide clients with qualitative information, for both small and large molecules, when they need it most.

Waters Xevo TQ XS LC-MS system

NEW STARTERS

We welcome Dr Nathalie Huther, who has recently joined Arcinova as Business Development Manager Europe.

CUSTOMERS

Arcinova now provide drug substance synthesis, drug product manufacture and analytical support to biotech and pharma companies in 4 continents.

Since the inception of Arcinova on 9th February we have hosted 49 client/partner visits, with more scheduled for the coming year. We have successfully completed 2 GLP and 11 GMP client audits since the 9th February 2016 and during our recent GMP MHRA inspection, no major or critical observations were raised.

Arcinova have donated a Waters Quattro premier mass spectrometer, together with some Liquid Chromatography (LC) columns and spare parts, to the Recycling Organisation for Research Opportunities (RORO).

CONFERENCES

Stuart McDougall, Bioanalysis Leader, will be attending the 2017 **EBF Annual Strategy Meeting** in Belgium, on the 14 – 16th March.

Mark Chadwick, Head of Business Development and Nathalie Huther, Business Development Manager Europe, will both be attending **Bio Europe Spring** in Barcelona on the 20th – 22nd March.

Nathalie Huther will be attending the **Swiss Biotech Day** in Basel, on the 4th May.
